## EDUCATION

**Bachelor of Computer Science** — **UNIVERSITAS INDONESIA** — Jul 2022 - Jul 2026

- **Information Systems** Major, **GPA: 3.59/4.00**
- **2nd Place** - Most Outstanding Student of Faculty of Computer Science (2025)
- **Full Tuition Scholarship** from the Indonesian Ministry of Education and Culture

## EXPERIENCE

### SINGDU — Jul 2026 - Present

***Founder & CEO***

- **Building a startup that helps people learn languages through songs**, combining multilingual karaoke with synchronized lyrics, pronunciation guides, translations, contextual vocabulary learning, social features, and shared KTV sessions.
- As a **solo founder**, I lead product vision, market and user research, roadmapping, pricing, brand, UX/UI, accessibility, localization, and engineering across Android, web, backend, data, security, and cloud infrastructure.
- I also run AI-assisted content production and catalog operations, analytics and growth, subscription and advertising monetization, community safety and support, privacy and legal compliance, QA, CI/CD, observability, and Google Play releases.

### DANA INDONESIA — Jul 2025 - Jan 2026

***Automation Product Developer Intern***

- Synthesized pain points from **15+ tech and non-tech stakeholders** across DANA's **largest Backoffice system**, identified **root causes** through structured analysis, and proposed **prioritized product recommendations** to address **operational bottlenecks**, enabling data-driven decision-making.
- Led end-to-end **product discovery** for AI-driven recruitment solutions (AI HR Interviewer & AI CV Scoring), delivering **competitor benchmarking**, **cost analysis**, and recruitment flow mapping with potential to cut hiring cycle time from an estimated **4 weeks to 3 weeks** for **company-wide** adoption.

### KITABISA — Feb - May 2025

***Test Engineer Intern***

- Conducted **market & competitive analysis** and **financial & cost analysis** of SaaS test management tools (Testiny, TestRail), led a **proof of concept** for an in-house alternative, and identified **IDR 300M+ in potential cost optimization**, presenting findings and recommendations to engineering leadership.
- Automated **50+ API test cases** with a Zod-based schema approach, **reducing test boilerplate** and improving maintainability across **5+ repositories**.

### INDODANA FINTECH — Jul - Sep 2024

***Marketing Technology Intern***

- Optimized campaign performance through **data-driven analysis** and **A/B testing (1-2 variants per campaign)**, leveraging segmentation and end-to-end tracking to improve **engagement and product adoption** across multi-channel CRM campaigns reaching **300K+ users per cycle**.
- Supported customer-wide communications to **1M+ users** by collaborating cross-functionally with Product, BI, and Design teams to **execute the PT name change announcement**, including launching supporting microsites.

### UKM KMBUI — May - Sep 2024

***Project Officer of Desa Binaan 2024***

- Led a **52-member, 9-division** community development initiative that raised **IDR 70M+** (**3x** previous year), initiated village **koperasi** planning, launched seputarkrecek.com for local tourism, and delivered a **7-day** on-site program driving **measurable social and economic outcomes**.

### OTHERS

- Committee (The Pacific Rim International Conference on AI) · 3x Speaker (640+ audience) · 3x Social Service Head · Ex-AIESEC

## PROJECTS

**K-Owl** - Undergraduate thesis project and AI-supported learning platform for turning K-W-L reflections, pre-post tests, and progress signals into a structured classroom learning loop using SvelteKit, Django REST, and FastAPI.

**Produck** - Personal website and daily life workspace for tools I wanted to use myself, spanning PM artifacts, OKRs, story maps, fintech research, job tracking, finance tracking, RSS trend summaries, and AI-assisted application workflows.

**Customer Churn Analysis** - Tableau dashboard identifying telecom churn patterns and retention opportunities from customer behavior, contract, and service usage data.
